## ARIUS

- Unmatched stability and response in a simplified, revolutionary design
- 6061 series heat-treated lightweight extruded aircraft aluminum plate
- Anodized metallic red finish
- Progressive Lateral Movement creates efficient pressure while eliminating traditional stress points that cause breakage
- Precision machined aluminum trucks with chromoly steel axles
- Unique urethane Butterfly Cushion design requires no adjustment – simply install and start skating
  - 4 sets of cushions included for exact tuning

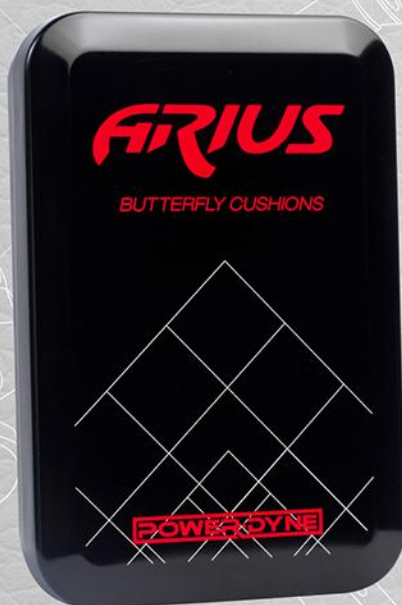

## WHAT IS THE ARIUS?

The Arios from PowerDyne is a complete reinvention of the quad roller skate plate. The patented Arios is lighter, stronger, more stable, more powerful, more maneuverable, more durable, and more efficient than any other plate, hands down. As an added bonus it is also astonishingly simple to set up for maximum performance.

The Key to the revolutionary design of the Arios is efficiency. Traditional kingpin plates pinch a portion of the round cushion against the kingpin to product movement, an inefficient design that requires constant adjustment to find optimal performance. The Arios features Progressive Lateral Movement of the truck. The axle presses the Cushion Crown of the truck evenly against the specially designed Butterfly Cushion, creating efficient pressure. The result is stability with immense amounts of action.

## ARIUS BUTTERFLY CUSHIONS

Made from high quality urethane, the Arios Butterfly Cushions retain energy and release it when you need it most. Designed specifically for the revolutionary Arios plate, the patented design of the Butterfly Cushion provides Progressive Lateral Movement, creating efficient pressure while eliminating stress points found in traditional roller skate plates. Available in 9 hardnesses, the Butterfly Cushions can be interchanged to match any skating style.

## REACTOR PRO SERIES

- 6066 series heat-treated lightweight extruded aircraft aluminum for optimal strength
- 10 degree kingpin angle
- Cold forged and black anodized solid 6061 aluminum trucks with chromoly steel axles
- Fine thread steel adjustable pivot arms
- Durable Delrin pivot cups
- Black anodized solid 7075 aluminum kingpins with integrated auto-centering Nylock adjustment nut
- Two sets of PowerDyne urethane Magic Cushions, soft and firm, for the perfect feel

## RIVAL

- 6061 series heat-treated lightweight extruded aircraft aluminum
- 15 degree kingpin angle
- Aluminum trucks with chromoly steel axles
- Steel rod reinforced pivot arms
- Durable dual density Delrin pivot cups
- Solid 7075 aluminum kingpins
- High rebound urethane cushions

## THRUST

- Reinforced durable nylon plate
- 15 degree kingpin angle
- Metal trucks
- Accepts adjustable stops, toe plugs, or bolt-on toe stops

## MAGIC CUSHIONS

Unique to PowerDyne Magic Cushions is the Power Assist formula for total performance. Made from high quality urethane, Magic Cushions retain energy and release it when you need it most. Just like shocks on a car, Magic Cushions soak up the imperfections on the surface, keep you connected to the road ahead through enhanced feedback, load up when pressed to the limit, and then release your stored power in a forceful, yet predictable manner. Available in 4 hardnesses, they are the most responsive cushions available for your skating skills.

## MOONWALKER TOE STOPS

Moonwalker toe stops from PowerDyne are designed in a distinct "tear-drop" shape which gives more flex, bounce, and extra control. The signature dimples on the stopping surface offer more bite when stopping and starting. Every Moonwalker is made from a non-marking natural rubber compound for outstanding durability and consistency on every skating surface including wood, sport tiles, cement, and outdoor surfaces (moon surface testing TBA...). Anodized lightweight aluminum stems are used for each Moonwalker, creating a secure bond with the rubber while adding increased strength, easier threading, and a distinctive blue-gray color to the stem.

## BEARING PRESS/PULLER

Installing or replacing your bearings is a cinch with the PowerDyne Bearing Press/Puller. It is a must-have item for aluminum hubbed wheels and those who are constantly changing bearings.

## Y4 SKATE TOOL

Versatile skate tool that includes a 1/2" socket, 11/16" socket, 9/16" removable socket, and 5mm T Handle Allen wrench.

## Y3 SKATE TOOL

A Handy skate tool that includes a 1/2" socket, 9/16" socket, and a 15/16" open wrench.

## BEARING TOOL

A metal bearing tool designed to make installing and removing bearings in nylon-hub or no-hub wheels a cinch. Because this tool works by slightly bending the hub of the wheel during installation and removal, it is not recommended for use with metal or aluminum hubbed wheels.

## 11/16" DELUXE SLIM WRENCH

4mm thick laser cut steel wrench perfect for tightening kingpins and Reactor 11/16" auto-centering Nylock kingpin adjustment nuts.

## 5MM T HANDLE THUMB SAVER

5mm T Handle Allen wrench with sturdy plastic handle. This tool makes tightening your toe stop a breeze. Buy one - your thumbs will thank you!

## ADJUSTABLE STOPS

Regular 5/8" bolt available in Black or Gray.

## BOLT-ON STOPS

5/16" bolt-on stops with rubber bell shape available in black or gray. Kids bolt-on stops available in gray only.

## MIDI GRIPPER STOPS

5/8" adjustable black rubber stops in the traditional size.

## JAM PLUGS

5/8" black rubber Jam and Rhythm plugs.

## KWIK CERAMIC

Ceramic ball bearings accelerate faster and roller farther than traditional steel ball bearings. They also are more resistant to dirt and moisture and are more durable than steel ball bearings due to the high hardness and chemically resistant nature of ceramic material. Kwik Ceramic bearings utilize the advanced characteristics of ceramic balls and combine it with a ceramic Titanium Nitride coating on both sides of the bearing shield and the inner and outer bearing races to create remarkable performance. Aside from the striking metallic gold finish it imparts on the surfaces it covers, Titanium Nitride is a corrosion-resistant material that hardens and strengthens the surfaces it is applied to – improving the lifetime durability of the surface by a factor of 4 or more and further increasing maximum roll. Kwik Ceramic bearings, quite simply, are the most advanced ceramic bearings available.

## KWIK SWISS NITRIDE

Utilizing precision Swiss-made hardened chromium steel alloy balls and lightweight, friction resistant Delrin® retainers, the races of the Kwik Swiss Nitride bearings – the surface where friction is created with alloy balls – are coated with a thin coating of Titanium Nitride, a durable chemical-resistant compound that will not chip, dissolve, or otherwise degrade even during the most extreme skating conditions. The Titanium Nitride coating finishes the races of the Kwik Swiss Nitride bearings in a beautiful metallic gold appearance and also strengthens them to produce the fastest longest roll available today.

## KWIK ZENITH

High polish chrome steel races, heat-treated alloy balls, and friction resistant Delrin® retainers help the Kwik Zenith take bearing innovation to new heights. Built and assembled with these premium parts in a clean room free of environmental pollutants, Kwik Zenith bearings offer a continuously smooth and fast roll while maintaining durability under the most extreme loads of roller skating. Kwik Zenith bearings are pre-spun using a high performance oil, making them easy to use right out of the box with no break-in period required.

## KWIK OIL

Kwik Oil is specially formulated to improve bearing performance and extend bearing life by coating bearing surfaces with a low viscosity lubricant that eases acceleration, enhances maximum speed, and reduces friction. Use the precision micro-needle applicator to add one drop of Kwik Oil per bearing after cleaning or if bearings are dried out. Kwik Oil is compatible with all skate bearings.
